

A40B-CAL/N | 串联两台分流器进行测量的小电流适配器 (N 到 N)

产品概述: A40B-CAL/N | 串联两台分流器进行测量的小电流适配器 (N 到 N)

The low current adapter is used to calibrate shunts at currents levels of 2 A or less. It connects together the current source and two shunts for calibration measurements. This adapter mates with N-type connectors to the shunts and a dual banana connection to the source. In this configuration, a certified or reference shunt is connected in series with a shunt that is being calibrated, which in turn are in series with a current source.
